

Деятельность администрации округа Киото по борьбе с глобальным потеплением.

1 Киото – место подписания Киотской конвенции

○В гармонии с окружающей средой

- Создание условий гармоничного существования человека и окружающей среды в округе, где 3/4 территории приходится на лесопарковое хозяйство.
- Разнообразие природной среды и ландшафтов служит для сохранения самобытной культуры и создания красивейшей окружающей среды.
- Наряду с существованием экологически чистого производства, в целях обеспечения наиболее гармоничного существования человека и природы, среди населения пропагандируется дружелюбный у окружающей среде образ жизни, основанный на как можно более долгом использовании предметов бытовой необходимости.

2 Деятельность в рамках мероприятий по борьбе с глобальным потеплением климата.

○Основное содержание (см. приложение)

- (1) План снижения выбросов в атмосферу, отчет, систематизация.
- (2) Озеленение крыш
- (3) Авторизация специалистов (система «Экомастер»)
- (4) Организация дня экологии в Киото
(День подписания Конвенции 16 февраля)

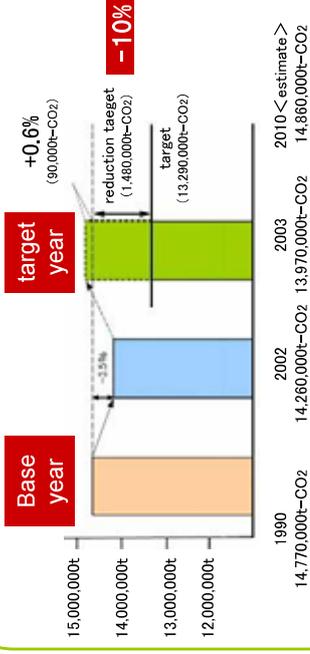

3 Деятельность по борьбе с глобальным потеплением климата на уровне администраций регионов.

- Предотвращение глобального потепления климата в мире станет возможным при кординальном пересмотре экономической системы и образа жизни, в результате непрерывного выполнения конкретных мероприятий.
- Необходимо ужесточить меры по контролю за выбросом парниковых газов во всем мире.
- СОПЗ Запуск проекта в честь 10 летней годовщины
(планируется на декабрь текущего года)

Global Warming Policy in Kyoto Prefecture

Greenhouse gas in Kyoto prefecture

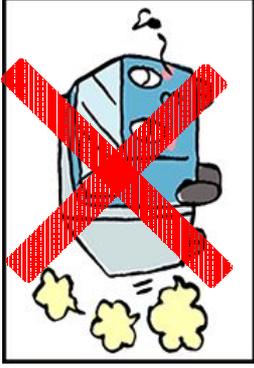

Stop Idling

Turn off the engine when the car is not in motion except when waiting for traffic signals or is a state of emergency.

- **Drivers** must stop idling when the car is not in motion.
- **Employers** must make their staff observe this rule.
- **Owners of large car parks (over 500㎡)** must make their users observe this rule.

Kyoto Prefecture's Ordinances to Prevent Global Warming

If you stop idling for 5 minutes every day for the course of a year, you can cut CO₂ emission by 37.7kg.

Online Energy Account Book

By using this service, you can calculate how much CO₂ is emitted by your household.

Wood Mileage CO₂

Certification

This system was established to reduce CO₂ emissions by transport. By using wood made in Kyoto prefecture, the transportation distance decreases.

Kyoto Prefecture's Ordinances to Prevent Global Warming

Tree Planting

When you build a structure with over 1000 m² of area in specified locations, you must make the premises greener. The specified locations are mainly those which have been designated for urbanization.

- We have a roof top garden on one of our government office buildings as a model. The garden is open to the public.

Kyoto Prefecture's Ordinances to Prevent Global Warming

Eco-Meister

Employers who meet certain criteria are able to make use of eco-meister.

- **Eco car meisters** are staff from car stores that promote low-emission vehicles.
- **Eco drive meisters** are staff from transport company that promote eco driving.
- **Energy Efficiency meisters** are staff from home electronics retailers that energy promote saving electronics.

Commitment to environmentally friendly transport and eco-driving

System in which transport companies make commitment to reduce CO2 emissions

Stop Global Warming

Kyoto takes the lead in greenhouse gas reduction.

To become an environmentally-advanced prefecture befitting the location where Kyoto Protocol was concluded, we have establish 'Kyoto Prefecture's Ordinances to Prevent Global Warming'. These ordinances came into force in April 2006. We are promoting a global warming policy based on these ordinances.

Kyoto Eco Energy Project

We promote the research and development of regionally-distributed energy systems involved with solar power, biomass energy, wind power and so on.

Green Purchasing

Green purchasing is the process in which people choose environment-friendly goods. The Kyoto green purchasing network popularizes green purchasing among the people and companies in Kyoto prefecture.

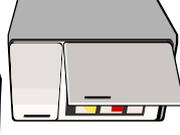

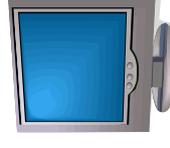

KES Environmental Management System Standard

This is an environmental management system that originated in Kyoto, but has since spread to all of Japan. Many companies are able to achieve certification because KES is an inexpensive and simple system.

Energy-Saving Label

Kyoto Prefecture's Ordinances to Prevent Global Warming

Large scale home electronics retailers must affix energy-saving labels on air conditioners, televisions, and refrigerators. When they sell them, they must explain the products' energy saving properties to the customers.

Goods marked five stars are the most eco-friendly.

Greenhouse gas reduction plan

Kyoto Prefecture's Ordinances to Prevent Global Warming

- large-scale companies
- electronic companies
- large-scale buildings

Employers must submit a greenhouse gas reduction plan should they meet the necessary conditions. The plan is then made to public.

Garbage Reduction

CO2 is discharged from garbage disposal. We promote the reduction of garbage through initiatives such as reusing shopping bags.
