

## Individual Projects of the Environment Subcommittee

### The Northwest Asia Youths' Environmental Symposium 2005

#### 1 Brief on the Results of the Symposium

- Presentations and an Environmental Study on the Recycling Society

14 groups (2 from Japan, 2 from Korea, 7 from China, 2 from Russia, and 1 from Mongol ) made presentations on their own activities such as segregation of garbage or recycling, and then, exchanged opinions. They also had lectures on environment.

- Cooperative Field Activity for Environmental Conservation

All participants made compost at a park near the symposium venue in Shenyang City. Also, a leaflet on the recycling society was handed out to each participant. They confirmed to expand the environmental activities after the symposium.

- Adoption of the Symposium Declaration

The symposium declaration was adopted to call for the affirmative participation of all youths in the Northeast Asia in environmental conservation activities that are necessary for the coexistence with the nature and a recycling-oriented society.

(Ms. Zhou, teacher of Teenage Science and Technology Institution of Xicheng District of Beijing)

### 4) Cooperative field activity (compositing raw garbage)

### 5) Adoption of the Symposium Declaration

#### Declaration of the Northwest Asia Youths' Environmental Symposium 2005

We, the participants of the Northwest Asia Youths' Environmental Symposium 2005, had discussion over the environmental problems around us and recognized that there were various kinds of the problems ranging from specific local problems to global ones. Also, we realized that daily life has something to do with their causes.

To solve these problems, more people should cooperate. Younger generation like us can address them. Indeed, there are many youths who are working on it.

We, as the participants of the symposium, hope that the environment in the Northwest Asia will be maintained and call for all the youths in the Northwest Asia to be our mutual partners participating assertively in the environmental protection activities with the aim of establishing a recycling-oriented society that can co-exist with nature.

August 22, 2005

All Participants of the Northwest Asia Youths'
